

Abstract

1  
2  
3  
4 A novel temporary posting sticker comprises a first area coated with a  
5 non-destructive adhesive coating and a second area substantially free  
6 from such non-destructive adhesive coating and a weakened tear line  
7 that substantially separates the first area from the second area. By  
8 tearing the sticker along the weakened tear line, the second area of the  
9 sticker, which may contain written or printed information, may be  
10 saved as an ordinary adhesive-free memo note thereby overcoming the  
11 nuisance inconvenient sticking to other surfaces exhibited by prior art  
12 temporary posting stickers. Alternatively, the novel sticker comprises a  
13 weakened fold line (score line) such that when the sticker is folded  
14 along the score line the adhesive coating on the first area is  
15 substantially covered and adheres to the back side of the posting  
16 sticker. Thus, the second area of the sticker may be saved without  
17 exhibiting any inconvenient sticking to other surfaces.
